Vintage Classic Bike Bells – Sample Library

25 .wav Files + .ods File List
96000 khz / 24 bit – Mono
Metadata added in WaveAgent

Thank you for downloading the Vintage Classic Bike Bells Sample Library.
This library is the first of a couple of small niche libraries I will be releasing at a affordable price. The idea is to have you pay, what you would have to spent on one file but leave you with the option to change the sound later in the project if you need a slightly different timbre. Therefore all sounds are similar, but slightly differ in tone, articulation or attack.

These 25 files were taken from 10 bike bells, given to me by Velo Wonka (www.facebook.com/velowonka). All bells were placed on 70s, 80s or 90s racing bikes.

If you need individual sfx or sample libraries (recorded or created) for your projects (game, feature film, advertisment, audio play...), please contact me at nils@itdmusic.com or 0049 (0) 1779419987.
