Pari Turbo BOY SX – Sample Library

24 .wav Files + .ods File List
96000 khz / 24 bit – Mono
Metadata added in WaveAgent

Thank you for downloading the PariTurbo BOY SX Sample Library.
This library is one of the small niche libraries I will be releasing at an affordable price.
The idea is instead of dozen of various machinery sounds you only get sounds by one
machine. Therefor you only get what you need and pay less.

These 24 files were recorded with a PariTurbo BOY SX medical device. Air flow is
generated and sent to a nebuliser and into a mask. It is an up to date machinery used in
many treatments with different medcine or NaCl.

It features motor-, airflow- and button-sounds.

If you need individual sfx or sample libraries (recorded or created) for your projects
(game, feature film, advertisment, audio play…), please contact me at nils@itdmusic.
com or 0049 (0) 1779419987.
